**CHARTWISE MEDICAL SYSTEMS TEAMS WITH TRUCODE  
TO PROVIDE BEST IN CLASS CODING AND DOCUMENTATION SOFTWARE**

**WAKEFIELD, R.I. -- (October ##, 2012)** – ChartWise Medical Systems, Inc., ([www.chartwisemed.com](http://www.chartwisemed.com)), an innovative Computer-Assisted Clinical Documentation Improvement (CACDI) software company, is pleased to announce it has partnered with TruCode to integrate its grouper, pricer, and editing web services into the ChartWise:CDI software solution.

ChartWise:CDI has the tools required by today's HIM departments to monitor their CDI programs and ensure revenue optimization. A web-based software application, ChartWise:CDI streamlines the CDI process using built-in expertise to translate clinical terms, labs, and medications into the diagnostic terms needed for complete and accurate coding. ChartWise:CDI features electronic queries, a flexible workflow, robust on-demand reporting and analytics, HIPAA compliant data security, reference materials, HL7 interfacing, and ICD-10 cross-references.

"TruCode's products and technology are a perfect fit for ChartWise:CDI, and we're looking forward to working with such an innovative and collaborative company," said Dr. Jon Elion, CEO and founder of ChartWise. "This agreement with TruCode gives our customers a proven grouping and pricing solution, placing reimbursement information at their fingertips."

Integrating TruCode's coding web service technology into ChartWise's established ChartWise:CDI software application will allow both organizations to continue to meet the needs of the coders and documentation specialists who look to them for assistance in optimizing their coding processes.

"ChartWise was looking to add grouping, pricing and editing capabilities into its ChartWise:CDI system," said Tom Golden, chief technology officer for TruCode. "Rather than interfacing to a separate encoder, they were able to integrate TruCode's web services to provide a seamless experience to their customers. Because the web services are hosted by TruCode, they also don't have to worry about applying updates – the groupers, pricers, and edits are always up-to-date."

**About ChartWise**

ChartWise Medical Systems, Inc. based in Wakefield, RI, is a medical software firm and the developers of ChartWise:CDI, a web-based solution for Computer-Assisted Clinical Documentation Improvement. ChartWise:CDI's clinical intelligence expertise assists physicians and clinical documentation specialists with increased efficiencies and completeness of documentation, queries and work flow. ### **About TruCode**

TruCode, with headquarters in Alpharetta, GA is a software company that provides an encoder application, components and web services to the hospital, consulting, and payer markets. TruCode was first to release a complete ICD-10 encoder, and the first to deliver encoder components via web services. TruCode is supported by HIM industry experts with over 25 years of experience. The encoder web services technology is currently utilized by the following types of solutions: Computer Assisted Coding (CAC), Clinical Documentation Improvement (CDI), Electronic Medical Records (EMR), Health Information Systems (HIS) and Healthcare Business Analytics. For more information visit: [www.trucode.com](http://www.trucode.com).
