

Critical Access and Community Hospitals Gain Integrated Encoding and HIS Solution

Single-database EHR and HIS vendor, RazorInsights, has partnered with medical coding software provider TruCode to provide hospitals integrated clinical coding capabilities.

Kennesaw, GA ([PRWEB](#)) May 20, 2014 -- [RazorInsights](#), a leading provider of health IT solutions for Rural, Critical Access and Community hospitals, today announced that it has partnered with [TruCode](#) to deliver one of the first hospital information systems with a fully integrated encoding solution.

“We’re excited to be incorporating TruCode’s Encoder Essentials into our ONE Enterprise HIS Solution,” said Reed Liggin, R.Ph, MBA, President of RazorInsights. “This partnership allows our hospital clients the ability to access coding tools more easily and accurately assign clinical codes. It will also enable us to alleviate some of their burden as they transition to ICD-10.”

With another ICD-10 delay, hospitals are dealing with many related frustrations and adjustments to their transition plans. This new integrated solution from RazorInsights and TruCode provides hospitals with a unique opportunity to improve coder productivity despite the potential need for dual coding in ICD-9 and ICD-10.

TruCode’s Encoder Essentials™ is a set of hosted web services and controls that provides coding professionals with the tools necessary to efficiently navigate the complicated world of coding. With Encoder Essentials, encoder interfaces are a thing of the past. Users no longer have to ping-pong between systems in order to perform the coding tasks vital to a healthy revenue cycle. Encoder Essentials includes sophisticated code search capabilities, comprehensive coding references, and code edit / reimbursement validation tools - all the components necessary for accurate and efficient clinical coding, embedded within the RazorInsights EHR.

“TruCode is excited to partner with RazorInsights to offer this unique integrated solution to the marketplace,” says Tom Golden, Chief Technology Officer of TruCode. “Many community hospitals will experience the benefits of this HIS system with TruCode’s encoder capabilities inside.”

About RazorInsights:

Based in Kennesaw, Georgia, RazorInsights is a dynamic healthcare information technology company. In keeping with the principle of Occam’s Razor, they have created a simplified HIS solution for Rural, Critical Access and Community hospitals. Introducing ONE — a single-database, cloud solution offering a simple user experience with cutting-edge clinical tools and industry-standardized data. Hospitals can expect to improve their performance and bottom line with ONE from RazorInsights. For more information, visit www.razorinsights.com or call 770-308-4111.

About TruCode:

TruCode, based in Alpharetta, GA, is a software company that provides an encoder application, components and web services (Encoder Essentials) to the hospital, consulting, and payer markets. TruCode was first to release a complete ICD-10 encoder, and the first to deliver encoder components via web services. TruCode is supported by HIM industry experts with over 25 years of experience. Our Encoder Essentials technology is currently utilized by the following types of solutions: Computer Assisted Coding (CAC), Clinical Documentation Improvement (CDI), Electronic Medical Records (EMR), Health Information Systems (HIS) and Healthcare Business Analytics.
